

# **SUSTAINABILITY REPORT HIKE&BIKE AGENCY 2020**

## **HIKE&BIKE VISION**

We want to become a leading travel agency in the Julian Alps that offers clients unique experiences of cycling and hiking in the mountains.

## **WHAT HAVE WE ACHIEVED IN 2020?**

- We started the process of attaining Travelife partner status.
- We tried our best to be responsible and sustainable in our waste management. We tried to minimise our waste and we recycled the waste that we produced.
- Although due to Covid-19 situation this year we experienced the decrease of guests, we still tried to encourage the guests who came to use public transport and soft mobility options that are available for them in our destination.
- We encouraged people who spent their summer vacation in Bohinj valley and day guests to rent bikes and explore the area by bike.
- Our printing was minimised as much as possible. We only printed the documents that were absolutely necessary.
- We started to send all our documents electronically to our account manager.
- We encouraged our suppliers to send us invoices electronically.
- We used bikes to commute to our office as much as possible.
- We have included in our tours visits of the local farmers market and visits of the local producers where the guests had the chance to buy local products and souvenirs on site.
