

# SUSTAINABILITY REPORT HIKE&BIKE AGENCY 2024

## HIKE&BIKE VISION

We want to become a leading travel agency in the Julian Alps that offers clients unique experiences of cycling and hiking in the mountains.

## WHAT HAVE WE ACHIEVED IN 2024?

- We have maintained our Travelife Partner status.
- We have done our best to be responsible and sustainable in waste management. We also recycled our waste on an ongoing basis.
- We have tried to encourage our visitors to use public transport and to make use of the "soft mobility" options available in our destination.
- We encouraged our guests who were spending their holidays in Bohinj to use bicycles when exploring Bohinj valley.
- We no longer print promotional material. Printing of other documents necessary for the company's operations has been reduced to a minimum.
- We have switched to sending documents electronically to our accounting department and no longer issue printed invoices.
- We have encouraged our suppliers to send us invoices by email.
- We have cycled to the office instead of driving whenever possible. We cycled about 800 km in this way.
- Our trips included visits to local markets and individual local producers, where our guests had the opportunity to buy local products and souvenirs.
- For our self-guided trips, we started measuring our carbon footprint using the Carmacal tool.
